## Section 1: What is SnapMory?

**Your memories. Smarter. Rewarded.**

SnapMory is the first **AI-powered photo app** that automatically analyzes, sorts, and organizes your photos into meaningful albums — **with zero effort on your part**. Using advanced recognition of faces, locations, and events, SnapMory builds intelligent collections that make your memories instantly accessible and beautifully arranged.

But SnapMory isn't just about smart photo storage.

Thanks to its **Experience-to-Earn (X2E)** model, SnapMory **rewards you** for engaging with your memories. Upload pictures, create albums, share experiences — and **earn SMRY tokens** in return. These tokens can be used for digital goods, photo prints, or even donated to meaningful causes.

SnapMory is your smart gallery, memory manager, and reward platform — all in one seamless app.

## Section 2: Key Features at a Glance

Not just a photo app — SnapMory is a **complete experience**.

- **AI-Based Organization**  
Automatically detects and organizes your photos by **faces, locations, time, and events**.
- **Shared Albums & Collaboration**  
Easily create **collaborative albums** for family trips, events, or special moments — invite others to contribute and enjoy.
- **Earn While You Snap**  
Every upload and interaction earns **SnapMory Tokens (SMRY)** — giving real value to your memories in the Web3 ecosystem.

- **Secure & Decentralized**

Your photos remain **truly yours**, stored using **blockchain technology and decentralized storage** solutions.

- **Social Impact Integration**

Use your SMRY tokens to support **charities, green projects, or community initiatives** — all directly from the app.

SnapMory merges **cutting-edge tech, social good, and real rewards** in one powerful platform.
